

# Protect Our Parks

## Measure 14-67

City parks belong to the people. We deserve a choice in what happens to our parks. **Measure 14-67 will let voters decide.**

### What is the park protection measure?

The park protection measure will give the people a vote before any city park can be sold or given away. It will be on the November 5 ballot.

### Why do city parks need protection?

The city recently took action in a closed-door meeting to sell a 5-acre park for \$1. Without protection, the same thing could happen to any city park.

### Why is a charter amendment the best way to protect parks?

A city charter amendment guarantees that voters will have the right to choose whether to sell or give away any city park.

**Our city parks are free to everyone, regardless of income, background, or age. We all benefit from our parks.**

Children get a healthy place to play, learn sports, and create lasting relationships with friends and nature.

Busy families have a place to spend time together and relax.

Tree canopies give us cooling shade, filter water runoff, and provide shelter for animals and birds.

**Our parks.  
Our choice.**

**Vote  
YES**
